

****Please see below for examples of academic related accommodations to be provided in accordance with the provisions of Diabetes Resource Manual for School Personnel (ADA). Select the accommodations that apply to your child's needs.**

Academic-Related Accommodations Requested:

- All school staff members who have responsibility for the child, including substitute staff, should receive yearly training that provides an understanding of diabetes and the child's needs, how to identify medical emergencies and which school staff members to contact with questions or in case of an emergency, as coordinated by parents.
- The student's teacher will work with the student and parents to coordinate a meal and snack schedule to coincide with classmates' schedule, to the closest extent possible. The teacher will notify the parents at least 48 hours in advance of any expected changes that may affect meal, snacks, or exercise routine.
- The student should not need to leave the usual setting for treatment of low or high blood sugar and should be allowed to have a snack anywhere including the classroom or school bus.
- A snack box, glucose meter and supplies shall be maintained in the student's classroom and the student should have immediate access to them for treatment of hypoglycemia and hyperglycemia.
- The student shall be permitted to carry on his/her person at all times: glucose tabs, glucose gel, glucagon, insulin pump, snacks, glucose meter and incidental supplies.
- The student shall be permitted to carry a cell phone to send and/or view glucose sensor values (if applicable) and/or to reach parents or healthcare provider. Wifi access should be available to prevent any interruption in glucose sensor data.
- The student will have unrestricted access to the school nurse/health office, bathroom, and drinking water.
- The school shall maintain records of the student's blood glucose levels and treatments.
- The school must communicate with parents daily about the student's glucose levels and treatment.
- The student's medical supplies including insulin and glucagon, and snacks must be maintained in the school's health office, and will also be available to the student on field trips and other off-site events.
- The student will participate fully in all extracurricular activities, including sports, field trips, enrichment programs, with access to the health accommodations contained in the student's Health Care Plan.
- A trained teacher or other designated trained staff shall accompany the student on field trips and provide accommodations in accordance with these provisions. If such staff is unable to be present, then the field trip should be cancelled rather than exclude a student due to his/her diabetes needs.
- A school staff member shall monitor the student's lunch to assess carbohydrate intake for insulin dosing and report intake to appropriate personnel.
- The student must have flexible scheduling and extended time for tests and exams, as needed.
- The student's bus driver shall be trained to recognize and treat hypoglycemia and hyperglycemia and in the administration of glucagon.
- The student shall not be penalized for absences for medical appointments and/or illnesses.

PLEASE NOTE THERE IS A 2 WEEK TURN AROUND FOR ALL FORMS
